### **DETAILED ACTION**

This response is in communication to amendment filed on 8/9/2005. Claims 1-32 were canceled. New claims 33-57 were added.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 33-38, 41, 46, 47-50, 52, 54, 56 and 57, drawn to network processing communication detectable device based on data driven or demand driven processor utilizing ID, tags, classified in class 712, subclass 26.
- II. Claims 39, 40, 42-45, 51, 53 and 55, drawn to a revenue collection method for collecting revenue based on content transmitted, classified in class 705, subclass 52.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the network detection, monitoring and reporting mechanism does not require revenue collection. The subcombination has separate utility such as content usage monitoring and revenue collection have separate utility apart from determining the identity of the user/receiver of the content. Therefore, since each combination/subcombination can have separate utility, this would require the examiner to perform two separate searches as claimed by applicant.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
